

Model 42 Loader Mount

The Model 42DL from BIG JOHN is the most durable 4-Bladed production digger you can find. Featuring all of the rugged design characteristics that make BIG JOHN Tree Spades the most sought after machines on the market. The Model 42DL is designed for production digging, on site digging and landscape jobs. Its Flexible enough to be mounted on a myriad of host vehicles including skid-loaders, wheel loaders and track loaders. Whatever your task, if you have 4" and smaller trees that need to be dug in any conditions, this is the machine for you.

Model 42DL mounted on Case 95 XT Skid-loader

(*) ROP = Roll over Protection

Attaching plates to mate the BIG JOHN transplanter to the host vehicle come with the purchase of your tree spade. We need to know what host vehicle you are going to use so that we may properly fit the plate. There are some exceptions to this so please discuss with your sales representative your vehicle and its attaching hardware requirements.

Model 42 Getting loaded for transport

Most customers opt to have their loader mount tree spades shipped directly to them. We do on occasion have customers that want to come to Heber Springs to pick the unit up. If you decide to pick your unit up please remember to bring an adequate transport vehicle and plenty of tie down hardware (i.e. Chains and binders).
