

**Model 45D Truck Mount**

Are you looking for the most durable and functional machine of any size? Check out the Model 45D truck mount from BIG JOHN. Used by nurseries, landscapers and tree moving professional, the M45D gets the job done. Whether you're B&B'ing or what we call "Dig & Delivering", the appeal of the M45D is in its compact yet sturdy design and its array of allied components. The 4 or 8 pod trailers along with the freestanding pod make this unit extremely flexible.

**Ready to Move Trees!**

# Model 45 Truck Specifications

The most popular trucks for this application are the F-450 Ford 4x4 and the Chevy or GMC 3500HD

- Many of the trucks in the 1-ton classification necessitate the use of an under hood or other special application “Wet Kits”, be sure to discuss this with your sales representative when considering trucks.

**84" Cab to Axle Minimum**

**Note:** Be aware of the location of fuel cells. Some 1-Ton Chassis Trucks have a fuel cell aft of the rear axle. This cell interferes with the mounting of the tree spade and must be replaced. Contact BIG JOHN Mfg., Inc. or your sales representative for more details.
